

== Exam Simulation ==

1. Question One: What's the capital of France?

- A) Berlin
- B) Madrid
- C) Paris ☒
- D) Rome

2. Question Two: Match the following items.

Term 1	→	Definition A
Term 2	→	Definition B
Term 3	→	Definition C

☒ All terms matched correctly.

3. Question Three: Consider the code block.

```
def greet(name):  
    print("Hello, " + name + "!")
```

Output if name = "Sean":

Hello, Sean!

– End of Section –

 Tips:

- ☒ Always verify line spacing.

- Indentation matters (tabs vs. spaces).
- Keep emojis intact if used.
- Punctuation at line endings (., ?, :, etc.) should survive encoding.
